FRONT-END DEVELOPER

AS AN EFFICIENT AND DETAIL-ORIENTED DEVELOPER

I am an experienced front-end developer with 1.5 years of experience. I hold certifications as a META full stack engineer and have earned additional certifications from IBM. Additionally, I have completed courses at Johns Hopkins University. After my formal education, I have maintained a commitment to continuous learning and professional growth, regularly earning new certifications and expanding my skill set.

I have cultivated excellent communication and leadership skills, and I thrive in a team environment. I am known for my strong sense of responsibility and accountability. Currently, I am actively seeking a full-time position to contribute my expertise and skills to a dynamic team.

CORE COMPETENCIES:

UX/UI	Performance	API Integration	Adaptability
Responsive Design	Problem Solving	Version Control	Package Managers

TECHNOLOGY STACK:

React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3/SASS, Python, Django, Postman, Insomnia, Tailwind CSS, Bootstrap, React Email, Resend, Vercel, Netlify, React Icons, CI/CD, MySQL, GitHub, Git, Vite, Figma.

EDUCATION AND CREDENTIALS:

IBM Full Stack Software Developer Professional Certificate	2023-present
Meta Back-End Developer Professional Certificate	2023
Meta Front-End Developer Professional Certificate	2023
Johns Hopkins University Certificate	2022
Central Ukrainian National Technical University Diploma	2013-2016

PROFESSIONAL EXPERIENCE:

Freelance | contract

React Developer, May 2023 – August 2023

Achievements:

I have successfully organized component structures, infused creative styles using Tailwind CSS and React Icons, and implemented contact forms for user feedback. My expertise extends to working with React Router, JavaScript, JSX, npm package management, Git version control, CI/CD, and Visual Studio Code.

Freelance | contract

Front-End Developer, December 2022 – February 2023

Achievements:

I excelled in creating user-friendly interfaces that effectively displayed data from tables in chart format. This involved utilizing the Chart.js library for data visualization. I also undertook the creation of a visually appealing design by integrating Tailwind CSS into the project. My role extended to API integration, and I ensured the functionality and reliability of the application through meticulous testing using tools like Postman and Insomnia. To enhance the user experience, I implemented dynamic animations using Framer Motion. Remarkably, I was able to complete the project a month and a half ahead of schedule, demonstrating both efficiency and technical proficiency in delivering quality results.
