SOFTWARE DEVELOPER

Fully customer-obsessed, cost-efficient, and result-oriented with leadership principles, specializing in building, designing, and implementing new features and enhancements. Maintaining existing functionality of the current content creation, management, and runtime system. Interact with external stakeholders on the business support system integration. Produce high-quality technical documentation. Understand design principles for iOS and Android. Proficient in React Redux state management, Next.js, JavaScript, TypeScript, Python & Django, Node.js & Express.

CORE COMPETENCIES

- UX/UI
- Responsive Design
- Performance
- Problem Solving
- API Integration
- Version Control
- Adaptability
- Package Managers
- Single Page Application (SPA)
- Application Development

TECHNOLOGY STACK

React, Redux, Next.js, TypeScript, JavaScript, Python, Django, C#, ASP.NET Core Web API, HTML5, CSS/SASS, Babel, npm/yarn, Postman, Insomnia, Pega, Figma, Tailwind, Bootstrap, Material UI, React-Email, Resend, MySQL, Prisma, MongoDB, Git/GitHub, CI/CD, GoDaddy, Vercel, Agile, Scrum, Kanban.

PROFESSIONAL EXPERIENCE

Cyberiny / SoftBank Robotics, Contract   Vancouver, BC
Full-Stack Developer   January 2022 - March 2024

SoftBank Group is a Japanese multinational conglomerate holding company headquartered in Minato, Tokyo which focuses on investment management. The Group primarily invests in companies operating in technology, energy, and financial sectors. SoftBank was ranked in the 2017 Forbes Global 2000 list as the 36th largest public company in the world. (www.softbankrobotics.com)

Responsible for the development and upgrades to the Whiz Connect application that allows office administrator to track, configure and manage a fleet of autonomous vacuum cleaner robots.

Selected Achievements:

- **Design and implement new features** and enhancements, as well as maintain the existing functionality of the current content creation, management, and runtime system.
- **Develop high-quality UX/UI** components from the initial design/prototype phase to production.
- **Demonstrated history of taking ownership** of problems and delivering complete solutions.
- **Actively contribute to the quality of software developmen**t by conducting thorough code reviews and providing guidance and support to team members through mentorship.
- **Increased development productivity** by integrating MUI (React Material UI) components into the Whiz Connect application instead of previously used custom components, allowing the utilization of many library-built-in features that significantly reduced the shipping time of new features, leading to a 40% increase in page load speed.
- **Enhanced user experience** by 30% through the implementation of aggregate views of robot tracking data, enabling users to access data across multiple locations and accounts.
- **Streamlined codebase size,** robustness, and maintainability, resulting in a 40% reduction in development time and increased overall efficiency.
- **Developed interactive data visualizations** using Tremor and the Chart.js library, resulting in a 30% increase in user engagement and a 20% decrease in bounce rate.

- ***Dev environment** (Key technologies)*: React, Redux, MUI (React Material UI), Chart.js, Tremor, Tailwind, Styled Component, Node.js, Express.js, npm, Git/GitHub, Visual Studio Code, Xcode, Jira, CI/CD, Agile/Scrum.

Continental , Full-time   Ukraine
Front-End Developer   December 2020 - January 2022

Continental is a Ukrainian company headquartered in, Kiev. The company primarily invests in Customer Experience, Technology Infrastructure, Digital Marketing. Continental was ranked 20th in the 2012 Top E-Commerce as the largest company in Ukraine.

Responsible for the development and upgrades to the existing website, developing high-quality UX/UI components from the initial design/prototype phase to production, and demonstrating a history of taking ownership of problems and delivering complete solutions by implementing the Stripe Checkout process.

Selected Achievements:

- **Enhanced the front-end interface**, improving usability and increasing customer retention rates by 25%.
- **Developed reusable React components**, enhancing code manageability and reusability by 60%.
- **Utilized SASS and Bootstrap** to create a modern and intuitive UX, resulting in a remarkable 40% increase in development speed.
- **Collaborated with external stakeholders** on the integration of business support systems.
- **Worked closely with both front-end and back-end** teams to develop internal projects and applications.
- **Participated in code reviews** and ongoing quality improvement efforts.
- **Maintained JavaScript** builds and extended Node.js REST API endpoints for data retrieval and persistence, validating results using Postman.
- **Integrated Stripe** for pricing within the checkout process, reducing the cart abandonment rate by 30%.

Dev environment (Key technologies): JavaScript, HTML, CSS/SASS, React, Redux, MUI (React Material UI), Bootstrap, Node.js, Express.js, yarn, Git/GitHub, Visual Studio Code, CI/CD, Agile/Scrum.
