WORK EXPERIENCE

SoftBank Robotics / Contract   **Vancouver, BC**

Full-Stack Developer   *Mar 2022 - May 2024*

- Designed and implemented new features and enhancements, and maintained existing functionality of content creation, management, and runtime systems.
- Focused on business goals by prioritizing customer satisfaction, increasing customer base by 12%.
- Leveraged TypeScript's static typing to reduce runtime errors by 30% and improve code maintainability.
- Improved speed and loading time by 40% by splitting code into reusable components and using lazy loading.
- Utilized Redux to manage global state, ensuring efficient data management in a lightweight manner.
- Implemented an Admin Dashboard, increasing user satisfaction by 25% and boosting app usage.
- Improved software quality through code reviews and mentorship, reducing development time by 40% and increasing efficiency.
- Integrated MUI components into the application, leveraging built-in features to streamline feature shipping, increasing page load speed by 40%.
- Developed interactive data visualizations using Tremor and Chart.js, increasing user engagement by 30% and decreasing bounce rate by 20%.
- Enhanced website's look and feel with Tailwind for simple, intuitive styling, improving UX and increasing development speed and productivity.
- Developed and implemented RESTful APIs to expose backend functionality, increasing frontend client interaction efficiency by 40%.

Continental / Full-Time   **Ukraine, Kiev**

Full-Stack Developer   *Dec 2020 - Jan 2022*

- Trained and supervised a team of 4 junior developers, boosting productivity and skill levels.
- Developed and expanded React applications, focusing on reusable components to minimize code repetition and improve maintainability, resulting in a 40% increase in code reuse.
- Developed and maintained the frontend with TypeScript, producing clean, modular, and well-documented code, enhancing efficiency by 40%.
- Collaborated with teams to integrate Redux for state management in React components, improving code organization and debugging capabilities.
- Enhanced the front-end interface, boosting customer retention rates by 40%. Utilized Tailwind and MUI to create modern, user-friendly designs, accelerating development by 30%.
- Managed JavaScript builds, increasing data accuracy by 40% through code base analysis. Expanded Node.js REST API endpoints for efficient data handling and validated with Postman.
- Took responsibility for integrating Stripe for pricing functionality in the checkout process, reducing cart abandonment rates by 30%.

Rozetka E-Commerce / Full-Time   **Ukraine, Kiev**

Front-End Developer   *Jan 2019 - Oct 2020*

- Managed and optimized a React application by splitting components into smaller pieces and using props for passing data, implementing lazy loading to increase loading speed by 25%.
- Implemented React and ES6 fixes and features, boosting user satisfaction by 20%. Improved productivity and maintainability by structuring the application into smart and presentational components.
- Responsible for updating the UI using Styled Components, Tailwind CSS, and MUI to create modern, reusable styles, reducing development time by 20%.
- Integrated new features, including Context API and Google Analytics, enhancing application functionality and user engagement.

- Proficiently utilized browser developer tools, including Chrome DevTools, to debug, diagnose performance issues, and optimize frontend code, resulting in a 30% increase in issue resolution efficiency.

EDUCATION & CERTIFICATIONS

Microsoft **Vancouver, BC**
C#, ASP.NET Web APIs Professional Certificate *Graduation Date: Mar 2024*

Meta **Vancouver, BC**
Meta Full-Stack Engineer Certificate *Graduation Date: Oct 2023*

IBM **Vancouver, BC**
IBM Full-Stack Software Developer Professional Certificate *Graduation Date: Nov 2022*

Central Ukrainian National Technical University **Ukraine, Kiev**
Bachelor's *Graduation Date: May 2016*

SKILLS

React, Redux, Context API, Next.js, TypeScript, JavaScript, OOP, Node.js, Express, Python, Django, C#, ASP.NET Core Web API, HTML5, CSS/SASS, Babel, npm/yarn, Postman, Insomnia, Pega, Figma, Tailwind, Bootstrap, Material UI, React-Email, Resend, SQL/MySQL, Prisma, MongoDB, Azure DevOps, Git/GitHub, CI/CD, GoDaddy, Vercel, Agile, Scrum, Kanban.
